=====

PROFESSIONAL SUMMARY

Dynamic Backend Developer and Data Analyst with an MSc in Data Science & Analytics (Merit) and a BEng in Software Engineering. Proven track record in building high-performance API services (Django, Spring Boot, Node.js), scalable data pipelines, interactive analytics dashboards, and custom chatbot platforms.

EDUCATION

- * MSc in Data Science & Analytics (Merit)
University of Westminster, United Kingdom (2024 - 2025)
- * BEng (Hons) in Software Engineering
University of Westminster, Sri Lanka (2020 - 2023)

WORK EXPERIENCE

Data Analyst | Crystal Events & Management, United Kingdom
January 2026 - Present

- * Analyzed and tracked event booking datasets, monthly sales targets, and balances.
- * Developed custom dashboard interfaces for booking sheets and event scheduling.
- * Integrated transactional systems to display real-time financial tracking.

Data Analyst | Virosa, United Kingdom
May 2025 - October 2025

- * Built multichannel sales performance projections and inventory tracking models.
- * Programmed e-commerce dashboard panels reporting Shopify/Amazon sales data.
- * Implemented forecasting calculators for seasonal stock replenishment.

Backend Developer | IT Domain, Australia (Remote)
January 2024 - December 2024

- * Engineered data infrastructure and high-performance API routes for the Antarians analytics platform, boosting visual query speeds by 40%.
- * Designed and built conversational AI modules for automated data retrieval.
- * Managed relational databases, indexing, and complex SQL transaction layers.

Software Engineer Intern | Informatics International Limited, Sri Lanka
2022 - 2023

- * Supported backend microservices development using Java, Spring Boot, and SQL.
- * Wrote comprehensive unit and integration tests using JUnit and Mockito.
- * Assisted in bug resolution, system refactoring, and technical writing.

PUBLICATIONS & HONORS

- * TAMZHI NLP Research: Lead Author of "TAMZHI: Shorthand Romanized Tamil to Tamil Reverse Transliteration Using Novel Hybrid Approach", published in the International Journal on Advances in ICT for Emerging Regions (ICTer), May 2024.
- * Bronze Medal for Applied Research & Innovation, ICTer (2025).

CORE SKILLS

- * Backend Systems: Python (Django), Java (Spring Boot, Microservices), Node.js
- * Data Science: Machine Learning, NLP, SQL (PostgreSQL, MySQL), R, Chart.js
- * Frontend & Mobile: ReactJS, JavaScript, Swift, Flutter, HTML/CSS
- * Languages: English (Fluent), Tamil (Fluent), Hindi (Fluent)
